Live your lives with the
faith, that the
center of your house is
forefathers.

Mr. Yushun Masunaga

Founder President of Eurasia Reiyukai

Lets bring the Result of the Consequences of the Practice of Great Reiyukai Teaching

In the true words of Great Guru Kimi Kotani "Education is for learning but Reiyukai Teaching is for practice". Realising this fact from the core of heart, shine the important treasure like a diamond, that one has to implement Reiyukai Teaching to his behaviour and avail opportunity to welcome better consequences. The diamond like treasure is the Gratitude and is the basis of Reiyukai Teaching. We should set up by availing opportunity to implement it and by developing the power of forgiveness.

From the directions of Guru Aan Ryo Gyo Toku Zen Shi "By spreading the Reiyukai Teaching among all human beings of the world, we can work for all living souls and can attain protection from Lord Buddha. Realising this fact, the limitless Eurasia Reiyukai Organisation is there due to Reiyukai Teaching. Because of this organisation and according to the relation of deed (karma) of our previous life we have been able to practice this great Reiyukai Teaching which would otherwise rarely be found even after the myriad of ages. Showing gratitude to this fact, we have availed the opportunity to implement the Teaching that protects the relation of Karma by correcting the sins and following the path of implementation of remembering the forefathers as guided by Bushogonen. According to the need of the time and hourly directions provided by the Founder President of Eurasia Reiyukai we are availing opportunity to learn farsightedness and art of finding solutions to various problems. We are bestowed with the opportunity to start any kind of desired work.

To protect the present world, we are to devote ourselves for the conservation and implementation of this Teaching and also by saving the souls of unnumbered forefathers we have to avail opportunity to see the practical consequences. The essence of Reiyukai Teaching is "Believing on the principles of one reality one should have Unitarian faith to keep the knowledge of Buddha's immortality". Having understood this by heart we must not miss to do Michibiki to fulfil the responsible duty of completing benevolence of peoples' enlightenment in the whole of the great Eurasia Island. Beholding the feeling of having the great vehicle (Mahayana) there should be blossoms of Sadharmapundarika Sutra throughout this region. To save the existence of visible and invisible world we must have 100% faith on the spiritual world and also avail opportunity to be united for the implementation of this Teaching.

Reiyukai Teaching always promotes the principles of equality without any discrimination between different races, religion, sex or communities. To save the source of our lives – the soul of our

forefathers; we have availed the opportunity to implement the 'practice of realisation' by remembering forefathers, practicing purification of Karmic relation and by the practice of correcting sins. As according to the directions provided by the Founder President a woman is like land and a man a pillar. Therefore when the land is strong the pillar will naturally become strong. To improve the present situation of nations the land should be kept strong. Every person living in a society should unitedly encourage and provide hope to the youths to change the

fate of their nation. They are also be encouraged to develop patriotic feeling. Reiyukai Teaching and Society Development Programme are the two wheels of a single chariot. Therefore it is the responsible duty of all individuals to join hands to implement Reiyukai Teaching in life and side by side work on the development of society.

To implement the Million Campaign, every individual member of Eurasia Reiyukai should walk together. Everyone must get opportunity to write Sokaimyo and should welcome the symbol of their forefathers in their individual houses. After establishing the Sokaimyo, one must get the opportunity to chant blue Sutra along with his member for the next seven days. There he should also teach his member the manners of philosophy too. To bring bygone forefathers at present, all members should be asked to collect at least 300 names of forefathers and should write Homyo which has to be established at Kakucho (Ancestor's Book) In this way one with folded hands must avail opportunity to establish heaven like happy home where life is led on the principles of Reiyukai Teaching.

Million Campaigns means providing opportunity to every member to get virtuous merit by doing Michibiki. The primary stage of this practice is the first three years when 1000 days of practice needs to be completed. In this practice, this year the 14th Chapter of Sadharmapundarik Sutra shall be implemented and all must avail this opportunity. On the coming 14th November 2014, following the path shown by the principle – living at present, everyone must participate enthusiastically with an experience of happiness on the 71st Memorial Ceremony of Great Guru Kakutaro Kubo combined with the Grand Gathering of Eurasia Reiyukai.

Teaching Sikobu Mr. Jiban Kumar Joshi

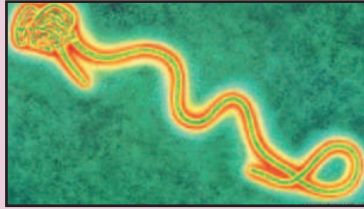

Celebration of Independence day of India

On the occasion of 68th Independence Day of India, Eurasia Reiyukai Head Quarter at Siliguri organised a children dance competition. The programme started with the unfurling of National Flag by the chief guest Epic Poet Sri Mohan Dukhun. The unfurling of flag was followed by the national anthem and Odaimoku. Children artist from different societies participated in the dance competition. The best performer in the single and group categories were awarded with prizes and certificates from the hands of the honourable chief guest and other special guests. 324 people had witnessed the programme.

Information on Ebola Virus

Ebola virus disease is a dangerous and fatal poisonous disease. This virus was first traced in the body of a bat called Ebola in Congo. Now it has been assumed that the virus is spread to the local people through animals of the area. Specially, people can be infected by this virus when they eat meat and come in direct contact with the animals. The disease infected meat of wild animals and their blood are the main source of transmission of this virus to the human beings. Animals like, Chimpanzee, Gorilla, Monkey, Pig, Deer, Porcupine etc and most Bats are the important sources of this disease.

The danger of getting infected is very high to the health workers and attendants of the virus infected people or patients. On the other hand, at the time of funeral, people died of the same disease, the person who comes in physical contact with the dead body could also easily be a victim of the virus. The World Health Organisation has declared Ebola as a 'worldwide epidemic' which has, till now, claimed the lives of more than 1000 people in Western Africa alone.

Medical specialists have said that the symptoms of Ebola virus are visible from the second day to the twenty-first day of its infection. The virus can transmit from blood, stool, urine, sweat, cough, saliva, semen and all types of liquid secretion from an infected human or animal body. The virus survives for many hours in such secretions. As the chances of spreading this dangerous life threatening disease worldwide is very high, we all need to be very careful, pre-active and take preventive measures at the earliest.

Symptoms of Ebola Virus

The symptoms of the virus in human body are visible from the 2nd to 21st days of its infection. At the primary stage a patients suffers from irritation in throat, eyes becomes red, cough, headache, muscle pain and high fever. In the second stage, abdominal pain, vomiting tendency, vomiting, loose motion, loss of appetite, weakness as well as number of red scars on skin can be visible.

At the third or the final stage, a patient feels shortness in breathing, liver and kidneys stop functioning and immense internal and external bleeding leads to death of the patient.

Preventive Measures

1. Avoid physical contact with infected people or animals, do not touch them.
2. Do not use clothes, dishes, food, bed, toilet etc used by infected people.
3. Pay more attention to cleanliness and keep a distance of one metre with the infected patients.
4. Avoid visiting infected areas.
5. Keep yourself away from wild animals and avoid eating their meat too.
6. Infected birds and animals should be carefully buried or put on fire.
7. If you feel that you are infected by the virus then, do not share it to anyone but definitely contact a health organisation without any delay.
8. Medical specialist or doctors should be extra careful and take proper precautionary measures while treating Ebola patients.
9. Corpses of Ebola infected people should be very carefully destroyed.
