BRIEF INFORMATION ABOUT SWINE FLU(H1N1)

Swine Flu

Swine flu is a respiratory disease which infects pigs but also people, typically those who have been in contact with pigs.

Symptoms in humans

Person-to-person transmission is through coughing, sneezing

The virus

Influenza A subtypes: H1N1, H1N2, H3N1, H3N2, H2N3

New "reassortant" virus

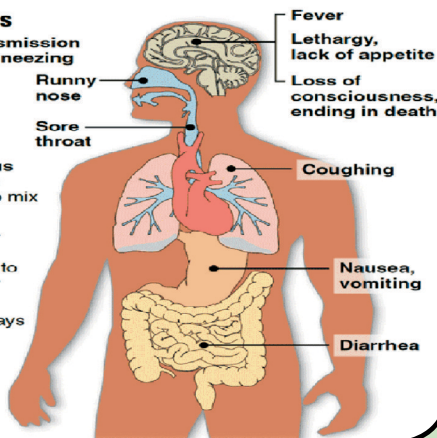

Forms when genes from different viruses begin to mix

When flu spreads

person-to-person, rather than from animals to humans, it can continue to mutate, making it harder to treat or fight off

Incubation time 5-10 days

There are no vaccines that contain current swine flu virus causing illness in humans.

Recently the numbers of people suffering & dying from Swine-Flu in different states of India has increased largely. Especially in the states of Gujarat, Rajasthan, Madhya Pradesh, Uttar Pradesh etc. the effects of this Flu has been alarmingly high. Till now more than 1071 people have died from this disease & more than 18000 people is said to have been diagnosed. The highest effects have been visible in Rajasthan, Nepal is also likely to see the spread of this disease & till now 3 deaths have been confirmed here.

What is Swine Flu?

Swine Flu is a contagious disease found in pigs. After the virus transfer from the pigs to any person, it spreads to other people too. A type of H1N1 in the influenza A virus is responsible for the oc-

currence of Swine Flu in an infected person initially. This is spread to people who are aware of pigs or are associated with jobs regarding pigs. However, afterwards when the infected person coughs or sneezes the virus spreads through the air & when a person nearby inhales, it gets transferred to her/him. By the virtue of it being extremely contagious, it can spread from one person to another with amazing speed.

Symptoms of Swine Flu

1. It is absolutely essential to visit the doctor in case of fever with high temperature associated with cough, cold & throat ache.
2. Loss of appetite, breathing problems, excessive tiredness, headaches.
3. Symptoms can be visible in chest & abdomen pains too. If these are seen, one should immediately visit the hospital.
4. Shivering, a continuous runny nose.
5. Muscle pain, blood visibility while coughing.

Measures to protect against Swine Flu

1. To prevent oneself from getting infected, one should adopt countermeasures while traveling from the house to the workplace.
2. It is essential to wash your hands & face thoroughly with soap.
3. Cover your nose & mouth fully while coughing or sneezing.
4. Use masks while traveling.
5. To resist the spread of Swine Flu, vaccinations are necessary but it is not advisable to totally depend on them.
6. It is suggested that one should sit keeping a distance of at least 6 feet from colleagues at the workplace.
7. In case of continuous fever & cough, one should avoid school, colleges, crowds & offices.
