## Excerpts of the guidance delivered by Eurasia Reiyukai Founder President in the gratitude festival held on 18th November 2015

### " The only light of an entire universe "

At present the life of Nepali citizens are very complicated. There is no fuel hence, bus, motor cycle, vehicle are not running on the road. Therefore, members are unable to come in this main event here. They are availing the opportunity to celebrate gratitude festival in their respective Mihata Branches. Late Mr. Kakutaro Kubo was Japanese due to karmic relation similar to you he was born in that particular country. I too have born in that country due to karmic relation. But we usually say Mr. Kakutaro Kubo as Great Guru Kubo. He was the adopted son in the Kubo family and his eldest brother was adopted by Kotani family. Both of them did very hard practices. His brother was Kotani Yasukichi and Mr. Kotani's wife was Kimi Kotani. They together 3 persons had practise very hard with a view to protect the human being of this universe and if not save them this earth could be ruined and find out the teachings of Bussogonen in Saddharmapundarika Sutra. As a result, we have availed an ample opportunity to practise great Reiyukai teachings.

I was not born by requesting my parents. Hopefully, you are also alike. We are not come in this world by asking our parents to deliver us. It is very difficult to find such brother and sister who are similar to one and another. One was born carrying the karmic relation with oneself. One was born because of karmic relation of being born from the parents. I was naughty so I used to think why my parents had to go for michibiki without giving importance to home. I asked my father that why I was born in this home? If I was born in any other home then that would be better. In reply my father said that that was happened due to lack of Karmic relation. You were born in this home due to your karmic relation. He told in this way but I could not understand what was he said. Gradually, having associated with Reiyukai teachings and implementing the same being a youth I came to realized that every thing happened due to karmic relation.

Whatever may be, we have not been born in this world being human for our own sake. As per your characters and habits yours behavior created. More significant to this you have born taking important things along with you. You all are born inheriting duties and responsibilities yourself in order to save this world.

You should take strong self confidence in yourself and availed the opportunity to know that why you have been born as a human being. You should availed the opportunity to save the seen and unseen world. No other person required of saving it but you are such a person who can save it. You should implement the 3 pillars of the Reiyukai Teachings and make others implement the same that is called Bodhisattavas. You came to this world taking duties and responsibilities along with yourself.

Instead backbiting let us talk about others positive things through this we can polish our soul. Due to the existence of another person we have our existence. In this way the gratitude is the basis of the Reiyukai teachings. Let us be grateful towards our ancestors and also to our family, neighbors, office and so on to all. We can open the mind of another person talking with smile with the feelings of gratefulness. This is basis of the Reiyukai teachings which should be started from today and now onwards. That is to be known as innerself development. Let us make ourselves being person of today's not to be introduced ourselves as the person of tomorrow. Let us change our future lives by building ourselves being a person of today.

I would like to pray for the prosperity of your work & family and also to implement the Bodhisattava's duties having realized your duties and responsibilities the duties with a view to safeguard this world. In conclusion, don't spread rumors, if anyone not able to make confirmation that whom, when and what time? somebody told him/her then that would be treated as false created by oneself.

## Experience of Happiness

Jun Hozashu: Mrs. Paro Rai  
Area: Bindu, India, 18th Group

Namaskar. Though, I have heard the name Reiyukai since my childhood but I availed the opportunity to become its member in the month of October 2011 after meeting my Oya. In the midst of practice my Oya enshrined sokaimyo at my home and advised me to start the actual practice of life by making sokaimyo a focal point. I started offering Sutra recitation towards the ancestors having welcomed sokaimyo at home and gradually practicing the teachings I have realized the development of feelings of quest of learning, feelings of gratitude and forgiveness within me. These things are being noticed by my parents, sisters and husband too. Previously I used to think that I don't have any weakness but having developed the practices towards spiritual world I came to know the real things of the life. I availed the opportunity to learn these

things from the practices of Reiyukai teachings. Initially, I feel extremely sorry and offer my forgiveness towards Go-hoza for the things which I could not do as well as prayed to be successful of doing michibiki and started to go off for michibiki practices. I made commitment to do at least 1 michibiki daily while going to garden works. Having organized michibiki gathering I availed the opportunity to enshrine sokaimyo of 7 members from that particular gathering and offering sutra recitation along with the members. Through this I take ample opportunity to groom myself together with my members. Having received the guidance that "gatherings are important" from my Shibuchō and Oya, I went to each home and take the opportunity to implement million campaign by making group of 10-20 persons of people. I would like to extend my heartfelt gratitude towards the Founder President for giving me an opportunity to practice the great Reiyukai teachings. I promise that I shall continue of practising this teaching being a divine light member of the Eurasia Reiyukai and availed the opportunity to write sokaimyo of the members myself by becoming a Hozashu throughout my life and help to spread Reiyukai Teachings.

## Appeal of the Eurasia Reiyukai Natural Environmental Protection Committee

Eurasia Reiyukai Founder President taught us that each and every matter should be implemented by oneself and make others implement the same. Therefore, with a view to create awareness for the protection of the natural environment also we should implement the following points by ourselves and make our members to implement the same. The earth we are living is our own, we should come forward to protect the environment of the earth. Thinking over it let us start from our homes.

1. Let us clean our home & surroundings by so that our home, streets, society, village and country ever remain cleaned.
2. Let us not litter places with rubbish and separate the waste for its proper disposal.
3. Let us create awareness among children regarding waste and educate them for the proper management of bits of paper, orange peel, plastics cover of the chocolates etc.
4. Let us separate the perishable and non perishable rubbish and prepare organic manure from perishable waste and use it. Avoid negative effect to the environment by using chemical fertilisers and pesticides.
5. Let us not keep plugs in sockets unnecessary for long periods of time. Let us reduce the production of carbon-dioxide by properly switch off electrical appliances after use.
6. Let us properly switch off Computer, Television etc and make a habit of the same to our children too.
7. Let us plant at our homes and surroundings and make an environment unpolluted by increasing the extent of oxygen.
8. Let us carry clothing bags from the home instead of plastic bags and make the natural environment clean by decreasing the unnecessary quantity of pollutant.

## Bagmati River cleaning under citizen's cleaning campaign

## Dhangadi Town cleaning under citizen's cleaning campaign

We have been availing the opportunity to continuously bringing out Eurasia Reiyukai Today newsletter for the last three years. We will get ample opportunity to publish it relentlessly in future too. We further request you to send your written advice and suggestions and also personal experience in Eurasia Reiyukai for Today newsletter.
