Greetings to all Namaskar Though I heard the name Reiyukai since childhood but I took the ample opportunity to become a member of it in January 2010. After entering the organisation I availed the opportunity to participate various gatherings. I actively participated the monthly gathering organised on 9th and 18th every month. I have been availing the opportunity to implement the guidance of Founder President receiving from the seniors participating the gatherings. The three pillars of Reiyukai ancestral remembrance, purification of karmic relation and polishing the offence through the practice of repentance touches my heart greatly. I was very influenced by knowing the fact of remembering and praying my ancestors being a woman. I take the opportunity to practice along with my oya, my own brother having seen him reciting

the sutra by enshrining the Sokaimyo. I gradually realised the development of feelings of quest of learning, Feelings of gratitude and forgiveness within me. I have been actively participating the activities carried out of this organisation like voluntary services of renovation and loss occurred due to massive earthquake in Nepal and citizen cleaning campaign frequently. It was very complicated or weakness for me to exchange namaskar, saying thanks and apologise at the time of meeting my members. Having realised this I started michibiki practice as I come to know that it can be solved through michibiki and slowly I was habitual on to it and realised the changes occurred within me. I take the opportunity to enshrined sokaimyo to the members whom I did michibiki and offered sutra recitation along with them and was successful to do 90 michibiki. There is no bound of my happiness to express my feelings that I have availed opportunity to take part Gohomyo Ceremony and completed 100 days practice within stipulated time and offering sutra recitation along with my members writing Sokaimyo of my members in my own hands.

Thank you, Namaskar.
