

## Guidance to the Youth by Eurasia Reiyukai Founder President Mr. Yushun Masunaga

We should see that the youths of our countries carry the spirit of nationalism with them. That means to awaken in them the sense of gratitude for having been born in their respective country. What then should be done to offer the gratitude towards the country? Herein lay the duties and responsibilities of the Reiyukai youths. What is important today is to make them anticipate results of what they have done as their duties and responsibilities. As for when the start should be made, it is from this very day, as no other day is as important as today. One should become the one of today and not of tomorrow. One should prove oneself to be a youth of such a kind as effective and efficacious as the bright shining sun.

- ❖ The youths from now on should take up the leadership with patriotic feelings and act with youthful vigor for the good of the generations to come.
- ❖ It is essential for them to be such youths as have appropriate ideas appealing to their duties to their respective society, land of their birth and the continent of Eurasia.
- ❖ Youths are required to be groomed properly and explained what should be their aim of life.
- ❖ It is essential for the youths to become such as go on saving the continent of Eurasia by acting zealously and wholeheartedly for the development of their respective countries with the strength not only of their own but of the merits of their practice as well.
- ❖ Let us be such youths as are tended to save our own country, bringing about improvement in our personal bad habits, and

change the mind of other people through our personal influence by practicing the great Reiyukai Teachings every day.

- ❖ The youths by nature are used to hear by their ears and do not act according to what they hear. Their mind is engaged in thinking something else even when their ears are hearing some important things. So howsoever try the ears do, the things they hear do not enter into their mind, and they are not acted upon. As such usually happens, in order to get them acted upon Mahaguru Mrs. Kimi Kotani used to reproach them loudly in order to improve their habits, and make them alert. This is what kindness is in the real sense. She used to say that to reproach is also an act of kindness. She used to reproach in order to remove badness in their character and make it good. Mahaguru Mrs. Kimi Kotani established Mirokusan in Japan as a practicing the Reiyukai youths thinking it essential for the youths to shoulder the responsibilities. With a great expectation from the youths Mahaguru Mrs. Kimi Kotani organized the Youth Wing that would think of the good of the country, wish world peace to be established and act as and when necessary at the time of social disaster.
- ❖ The Eurasia Reiyukai has also started operating the Youth Wing, Ladies Wing and Children's Wing, Myo Ichi Kai. It is very necessary for the youths to act as engineers, making their contribution from the youth side to drive forward this land and the continent of Eurasia as well.

## Experience of Happiness .....

My name is Ketarnath Maurya. The Michibiki Oya who introduced me to this sacred organization is Sita Bhusal (Acharya) and my Shibuchō and Teaching Member is Bishnu Prasad Ghimire. Having had the opportunity of joining this sacred organization I am having the chance of undergoing practice in the capacity of a Hozashu. My Michibiki Oya and myself were the students in the same college. I was selfish by nature prior to joining this organization. Through the practice of the Reiyukai Teachings the selfishness has gone and I can now feel the pains and sufferings of other people. Subsequent to my joining this organization I got the opportunity to receive M.C. training organized by it which has developed capacity inherent in me. I have got the opportunity to closely learn the meaning of the Reiyukai Teachings, discipline, behaviors of the members, ancestral remembrance and sense of gratitude by taking part in the Reiyukai gatherings. Acting according to the guidance given by my Oya I got an ample opportunity to enshrine Sokaimyo in my house on September 17, 2001 and have got the opportunity to practise ancestors' remembrance and recitation of the Sutra. This has enhanced my self-confidence all the more.

Owing to my devotion and efforts I got the opportunity twice to practice in the Sthirmati Hills. There I got the opportunity to receive guidance directly from the respectable Eurasia Reiyukai Founder President together with the power of Odaimoku. After I returned from the Sthirmati Hills practice I started spreading the Reiyukai Teachings and organized Michibiki gatherings with the cooperation also of my Michibiki Oya in my area. In the same way I got the opportunity to make the fellow class mates and teachers of my college, who took part in the Michibiki gathering, the members of the Reiyukai. Whenever I came across any new friends in my college I used to discuss with them about the Reiyukai and told them what I learnt from the monthly gatherings, which helped me stand as a good friend from their point of view. So I have become what I am today. Otherwise I do not know which way I would have been led to. In the course of undergoing practice I heard the respectable Eurasia Reiyukai Founder President being very much concerned about the change of climate that has caused several sorts of problems crop up in the world. This has awakened in me a sense of doing something for minimizing this problem. Accordingly I got the opportunity to take part in the tree plantation programme organized by the Eurasia Reiyukai 22nd Branch in January 2012. And I have now been actively engaged in bringing about awakening among the people by sharing my experiences with them in various gatherings and functions about the change of climate, while at the same time I

have been, availing of the opportunity to express greetings, gratitude and appreciation with smiling face.

Having got the opportunity to enshrine Sokaimyo in the individual houses of my friends and with the merits received out of the Michibiki done of more than 10 persons, I have got the chance to participate in the ceremony of receiving Gohomyo by me and two members under me. In the beginning I found it very difficult to scribe the Gohomyo. Later after proceeding with a will to write it well, concentrating my mind on the Gohozo, I went on improving day by day until at last I could complete the 100 days practice of writing the Gohomyo exactly in 100 days. Until now I have got the opportunity to do Michibiki of 200 persons, enshrining Sokaimyo in the houses of 60 persons and creating 33 Hozashus.

My life has undergone great change subsequent to my joining the Reiyukai. In the course of my daily life I have got the opportunity to apply the smiling practice. The persons in the neighborhood who have been witnessing my nature and ways of working comment today that there is a great difference between the Ketar of those days and the Ketar of today, hearing which I feel very much happy. Thus I have got the opportunity to feel proud of becoming a member of the Reiyukai. I have now been having the opportunity to participate in the gatherings and doing Michibiki continuously, getting the opportunity to realize that total change can be brought about in the villages, societies, areas, nations and the world as a whole by way of development thereby to make a success of the dream of establishing world peace. Thus being happy and proud of having the opportunity to practice the Teachings joining this sacred organization, I vow to go on creating Hozashus and Jun-Hozashus by doing Michibiki as much as possible till to the end of my life travelling to the new places with my Oya and doing duties for the happiness of not only myself but of others as well.

Thank you ! Namaskar !
